WORK EXPERIENCE

INFI USA | Chicago, IL | Jan 2025 – Present

Product Manager | Jan 2026 – Present

- Own end-to-end delivery of POS-integrated features for a restaurant kiosk SaaS platform across Square, Toast, Lightspeed, and HungerRush.
- Gather merchant requirements and run comparative POS research to shape the product roadmap and prioritize the feature backlog.
- Turn merchant needs and research into PRDs, user stories, and acceptance criteria; drive scope and prioritization decisions with engineering, QA, and the product team.
- Produce mockups and user flows for new features, walk engineering and QA through requirements, and run acceptance testing before release.
- Present newly shipped features to the full company in a monthly product demo.
- Led Square Smart Menu, the platform's first two-way POS menu sync — defined import scope, attribute-level sync rules, and the library-to-menu override model; launched to 400+ merchants at 100% coverage.
- Scoped combo pricing models and HungerRush coupon logic (order-level, item-level, and BOGO), driving decisions on pricing behavior, ordering UX, and data mapping with engineering.

Scrum Master | Jan 2025 – Jan 2026

- Facilitated Agile ceremonies (stand-ups, sprint planning, reviews, retrospectives) for cross-functional teams building SaaS kiosk solutions, improving velocity and sprint predictability.
- Partnered with the product owner to refine and prioritize the backlog, translating roadmap commitments into sprint-level delivery plans.
- Removed blockers and managed cross-team dependencies to keep kiosk releases on schedule and aligned with business objectives.

Amberleaf Home Inc. | Chicago, IL | May 2024 – Jan 2025

Project Coordinator

- Managed simultaneous projects across the production lifecycle from procurement to delivery, tracking scope, timelines, and change orders.
- Served as primary client contact, translating client requests and custom requirements into actionable internal specifications.
